Subject: Re: Region 6 Animas/San Juan River Water Sampling data for August 6th

got it--thanks. So how's this?

Intro page:

EPA water quality data collected in the Animas and San Juan rivers in New Mexico on Aug. 6, 2015, including at locations in Aztec and Farmington.

Main data page for that date:

Today, EPA has released additional water quality data from Aug. 6, 2015, on the Animas and San Juan rivers in New Mexico, including at locations in Aztec and Farmington.

To assess the impacts of the release at the Gold King Mine, water quality samples were collected at ~~four~~ two locations for 24 metals. Each surface water sample was analyzed for metals including arsenic, cadmium, lead and mercury.

Due to the highly variable conditions typical of this segment of the river, additional testing will be conducted, and we continue to work closely with the State of New Mexico ~~Navajo Nation~~ EPA on assessing drinking water, agriculture, livestock, and other critical water needs.

Water quality data from Aug. 6, 2015, on the Animas and San Juan rivers in New Mexico:

Subject: RE: Region 6 Animas/San Juan River Water Sampling data for August 6th

As these are the water intakes, we cannot get too specific, I would think the best would be 1 in Aztec and 1 in Farmington

thanks everyone--do we have more specific locations for where this data was collected?

This is what we said for the data we posted on the 15th:

EPA water quality data collected in the San Juan River between Farmington and Shiprock, New Mexico. Sample date Aug. 9, 2015.

Matt and Kathie:

For the august 6th data set, is there is there an expanded one-line statement we can say about the location of the August 6th data. For example the August 12th data set, the messaging had a first line statement of: "Ten surface water samples were collected at nine (9) locations south of Colorado along the Animas River and the San Juan River of New Mexico on August 12th, 2015".

Can we use this same statement but just replace the number of samples and the date?

Terry
